A JPL Scientist's Forays into the Strange World of Public Communications

Presented by Ellis Miner, Planetary Scientist

Miner will talk about his experiences as a public lecturer - how he campaigned to be the heir to Al Hibbs (The Voice of Voyager), tutored his seven kids and others, visited their classrooms, fielded interviews with media personnel, chaired a JPL ad hoc advisory committee to help scientists bridge the gap to formal education circles, participated in Project Astro, and co-directed the Solar System Exploration E/PO Forum for NASA Space Science.

Everyone is welcome.
